

## **RISO Applications for Automobile Dealerships**

**This story is an older one, but the applications remain the same:**

“Several months ago, one of my dealers sold a GR3750 to a medium sized auto dealership. Recently, I followed up with the customer and found that they are extremely satisfied with their equipment. Prior to purchasing the Risograph, they were outsourcing spot color and long run print jobs and producing some forms and flyers on their copier. The business manager tells me that the machine has already paid for itself and is saving the company over \$25,000 per year in printing costs. Below is a list of some of the *some* of the applications that are being produced the Risograph. They tell me that the list continues to grow.”
