Type	Duplicator	Duplicator	Duplicator	Production Duplicator	Copy/Print/Scan
Max Speed	Up to 130 PPM	Up to 150 PPM	Up to 150 PPM	Up to 190 PPM	Up to 90 PPM
Max Image Area	Legal	Ledger	Ledger	Ledger	Legal
Ink (Spot Color)	1 Color 1 Pass	1 Color 1 Pass	2 Color 1 Pass	1 Color 1 Pass	Mono-Color / Full Color
Controller	GDI Inc.	GDI Inc. / PostScript Opt.	GDI Inc. / PostScript Opt.	GDI Inc. / PostScript Opt.	GDI Inc. / PostScript Opt.
Cost Per Page	As little as 1/3¢	As little as 1/3¢	As little as 1/3¢	As little as 1/3¢	Under a 1¢ / 3¢

It's A Colorful World We Live In!

From tablets to gaming systems, mobile phones, and more; children are exposed to a full color experience in everything they do every day.

In fact, the first time that most children are exposed to monochrome is when they enter school.

Coming from a vibrant, color-filled world, is it any wonder that children have a hard time staying on task and focused on their black and white home & class work when there are so many colorful options around them trying to steal their attention?

Printed documents continue to play a vital role in education despite the rise of the digital age. Almost 70% of K-12 instructional materials are still being printed as hard-copy handouts, and RISO ComColor Series Inkjet printers allow schools to affordably add value to these handouts using color. **Color printing with a RISO is affordable!**

Color for Under a Penny!

It is rare today to find a school that has not been hit with budget cuts that impact the success of important programs. Many public K-12 schools have had their state and federal funding reduced and continue daily to strive to do "more with less."

A RISO can print in Mono-Color for under a penny and in full color for under 3 Cents.

High-speed duplicators/inkjet in centralized printing environments are not a fantasy, but rather an approach that many schools are implementing with phenomenal savings. **One school district reduced copier supplies and maintenance costs by 68% in one year. This district saved \$487,440 per year** with just 43 high-speed inkjet printers handling the printing jobs for the entire school system. **Another school district saved \$379,537 by employing a series of high-speed inkjet printers.** Today, school districts are routinely asked to make deep budget cuts, and important programs are being reduced or eliminated to make up for reductions in the budget. **Having an additional \$400,000 or \$500,000 in a district budget** is an unheard-of luxury—but it's a luxury that many school districts are enjoying due to centralized high-speed RISO inkjet printing.
